

Surviving an Active Assailant Incident

Criminal Mass Casualty (CMC) incidents have continued to increase in the United States. When a CMC incident occurs it not only dramatically impacts the immediate victims,

the severity affects the entire community by increasing feelings of vulnerability. As a result, there is amplified public scrutiny and pressure on public agencies to increase preventative measures in order to mitigate these types of events.

While site hardening can help to reduce the possibility of a CMC incident, it is not a guarantee of safety. Public agencies should strive to employ a comprehensive multi-layered security plan, which includes an intense staff training component. Providing staff with realistic and interactive training can improve their ability to react in a purposeful manner during a high stress situation.

Training Goals

IMReady's™ "Surviving an Active Assailant" (SAA) training is specifically developed to empower employees with the knowledge and tactics required to increase their odds of surviving a CMC incident. While the training is tailored to the work environment, the principles can also

be applied to situations that occur outside of the work environment. SAA is a live interactive training, presented to your staff in their work environment, by an IMReady subject matter expert.

Concepts covered in SAA training include, but are not limited to the following: Run-Hide-Fight, Developing A Survivor's Mindset, Recognizing Red Flag Indicators, Improvised Device Recognition, Visual Weapons Screening, and Barricade Techniques.

This course is instructed by former law enforcement officers. All instructors hold a current California Peace Officer Standard & Training (POST) AICC certification.

(continued on back)

Surviving an Active Assailant Incident *(continued)*

- **In-Person Training** – An IMReady team member will provide in-person SAA training for agency staff members.
- **On-Site Assessment** – An IMReady team member will conduct an abbreviated assessment of a single agency site with emphasis placed on security-related issues such as lockdown protocol, emergency equipment, site hardening, and best practices (must be conducted consecutively on the same day as the SAA training).

Upon completion of this course, attendees will have a basic understanding and awareness of CMC incidents as well as possess the knowledge, will power, and tactics necessary to increase their odds of survival during a CMC incident.

Additional IMReady Services Offered:

- Crisis First Responder for Schools (CFR-S)
- Security and Behavioral Health Assessment (SaBH)
- Threat and Physical Security Assessment (TaPS)
- Comprehensive School Safety Plan Development (CSSP)
- Executive Emergency Management Training (Roles and Responsibilities)
- SB-390 School Security Officer Certification Course
- Facility Design and Security Characteristics
- Conflict De-Escalation Training
- Emergency Operations Plan (EOP) Development
- Continuing Professional Training for Security Officers (CPT-S)

How you can get started

Empower your team to execute their incident management roles and responsibilities with greater confidence and effectiveness when lives are on the line. Let us design an IMReady training program for your organization.
